ABOUT ME

I was always interested in programming from a young age, but life took me on a different path. Eight years ago I decided to rekindle my passion towards technology, more specifically programming. I started to familiarize myself with various programming languages, platforms and services. Then, four years ago, I was offered the opportunity, which I was extremely happy about, to strengthen my knowledge even more by completing my education and obtaining the title of computer technician. Now my knowledge of programming languages and other technologies related to programming is even more solidified. Most recently I was employed in the company Origimed d.o.o., where I had the role of software developer and responsibility for the development and production of reusable and sustainable software code.

EDUCATION AND TRAINING

Computer technician

B2 - high school [1. 9. 2020 – 9. 9. 2022]

Address: Tržaška cesta 42, 1000 Ljubljana (Slovenia) **Website:** <https://www.b2.eu/sl/srednja-sola/studijski-programi/tehnika-racunalninstva>
